

§ 101-5.104-2

assessments jointly conducted by local agencies.

[56 FR 33873, July 24, 1991]

§ 101-5.104-2 Basis for determining economic feasibility.

(a) Whenever possible, determination of the economic feasibility of a proposed centralized service shall be based upon standard data on the relationship of the size of the Federal building, the number of occupants, location, and other factors pertinent to the type of centralized service being considered.

(b) In the absence of standard data on which a determination of economic feasibility can be based, or where such data must be supplemented by additional factual information, a formal feasibility study may be made by GSA or a CASU workgroup, in coordination with local agencies to be involved, prior to a final determination to proceed with the furnishing of a centralized service. Generally, a formal feasibility study will be made only if provision of the proposed centralized service would involve the pooling of staff, equipment, and space which occupying agencies otherwise would be required to use in providing the service for themselves. Examples of centralized services which may require formal studies include printing and duplicating plants and similar facilities.

(c) On the basis of experience under the centralized services program, GSA will develop criteria as to cost comparisons, production needs, building population, number of agencies involved, and other appropriate factors for consideration in determining the practicability of establishing various types of centralized services.

§ 101-5.104-3 Data requirements for feasibility studies.

(a) The data requirements for feasibility studies may vary from program to program, but shall be standard within any single program. Such data shall disclose the costs resulting from provisions of the service on a centralized basis as compared to the same service provided separately by each occupying agency, including the costs of per-

sonnel assigned to provide the service, comparative space needs, equipment use, and any other pertinent factors.

(b) Wherever feasible and appropriate, data will be secured directly from the prospective occupying agencies, subject to necessary verification procedures. Suitable standard formats and necessary instructions for submission of data will be prescribed in applicable subchapters of chapter 101.

(c) Agencies required to submit data for a feasibility study will be furnished with copies of the prescribed reporting forms and such assistance as may be needed to assure their accurate and timely completion.

[30 FR 4199, Mar. 31, 1965, as amended at 56 FR 33874, July 24, 1991]

§ 101-5.104-4 Scheduling feasibility studies.

The schedule of feasibility studies will be coordinated by GSA with its construction, space management, and buildings management programs. Before initiating the study, the Administrator of General Services, or his authorized designee, will give at least 30 days' notice to the head of each agency that would be served by the proposed centralized facility. Such notice will contain an indication of the cost elements involved and the general procedures to be followed in the study.

§ 101-5.104-5 Designating agency representatives.

The head of each agency receiving a GSA notice regarding a scheduled feasibility study will be requested to designate one or more officials at the location where the study will be made who may consult with authorized GSA representatives. Such information and assistance as is required or pertinent for an adequate review of the feasibility of the proposed centralized service shall be made available to GSA through the designated agency representatives.

§ 101-5.104-6 Conduct of feasibility studies.

An initial meeting of the representatives of prospective occupying agencies will be held to discuss the objectives and detailed procedures to be followed in the conduct of each feasibility
